

# W.E. RAWSON

## COMPANY QUALITY POLICY

W E Rawson Ltd is committed to providing its customers with high quality products combined with excellent service and support as we realise that our customers' success leads to our own success.

High standards of quality only result from good planning, appropriate investment in suitable equipment, thorough training and good management practices and Driving Continuous Improvement of the management system throughout the Business.

In order to deliver this Quality Policy, the company maintains and implements a Quality Management System. This is a module based electronic quality management system (EQMS), which covers all of the company's requirements. This also defines management responsibilities, operating procedures, and all of the company's controlled documents. The quality objectives are incorporated at Management review meetings.

The company realises that the commitment and implementation of a Quality management system is vital to ensure its long term success.

W E Rawson Ltd operates a Quality management System which complies with all legal and regulatory requirements including ISO 9001 standard, for which we have the following Scope:

The design and manufacture of needlepunch floorcoverings and felts, plain needlefelt, polymer coated needlefelt and fabric, sealed tubular liners for use in pipeline and sewer renovation, fibrous textile fillings, felts and insulation materials
