

Chichester High School

At Chichester High School, 'encouragement for students to be confident, caring and capable of taking on life's challenges', is at the heart of what the school achieves. The summer refurbishment works included a new library floor, where Rawson Carpet Solutions have supplied their Solution dyed nylon range of carpet tiles called 'Jazz'. Colour Grape has been used to good effect with the product offering class 33 heavy contract rating and castor chair resistance. Jazz is manufactured **Carbon Neutral**. There are many requirements of an education flooring solution and after 50 years of supplying the industry, confidence can be gained in securing the right carpet tile solution for the education space to ensure longevity, easy cleaning and improved aesthetics.

In addition to school flooring solutions, Rawson have also supplied their Decorale acoustic wall covering to be used as pinboards around the school, Decorale is a competitive pinboard solution which is 100% recyclable.

The library space looks bright and offers an encouraging learning workspace, however there are many demands of a library floor including sound reduction. Jazz standard nylon carpet tiles from Rawson Carpet Solutions achieve 26dB sound reduction which helps greatly with the environment and aids concentration. Using Rawson's 'quietback' system sound reductions of 29dB can be achieved to further quieten the learning space
